

LAPTOP REQUEST CATALOG ITEM

Project Description:

The ServiceNow Laptop Request Catalog Item project was developed to streamline and automate the laptop procurement process within the organization. Previously, employees relied on manual email-based requests that led to delays, miscommunication, and lack of transparency. The objective was to introduce a self-service portal where users can request laptops efficiently, ensuring faster fulfilment and improved user experience.

The implementation of the catalog item successfully automated the end-to-end laptop request process — from submission and approval to fulfilment and delivery. The new workflow significantly reduced manual effort, ensured accountability, and enhanced overall service delivery.

Problem Statement:

Employees in the organization need a quick and efficient way to request laptops for work. The current process is manual and prone to delays, with no dynamic form behavior to guide users or ensure accurate data collection. To address this, a Service Catalog item needs to be created, allowing users to easily request a laptop, with dynamic fields, clear instructions, and additional functionality like resetting the form if needed. The solution should also ensure all changes are tracked for governance and deployment.

STATE FLOW DIAGRAM

A state flow diagram (also called a state machine diagram or state transition diagram) is a visual representation of how an object, system, or process transitions between different states based on events, conditions, or actions.

Key Elements:

- Catalog Item: "Laptop Request" under "Hardware" category.
- Variables:
 - Laptop Model (Single Line Text)
 - Justification (Multi Line Text)
 - Additional Accessories (Checkbox)
 - Accessories Details (Multi Line Text)
- Catalog UI Policy: Shows Accessories Details only if Additional Accessories is checked.
- UI Action: "Reset form" available on the Shopping Cart.

STATE FLOW DIAGRAM:

TASKS & PROGRESS

This screenshot shows the 'Update Set - Laptop Request' form in ServiceNow. The form is divided into two main sections: a left sidebar for metadata and a right section for details and description.

Left Sidebar (Metadata):

- Name:** Laptop Request (highlighted with a green box)
- State:** In progress (dropdown menu)
- Parent:** (empty field with a search icon)
- Release date:** (empty field with a calendar icon)
- Install date:** (empty field)
- Installed from:** (empty field)
- Description:** (empty text area)

Right Section (Details):

- Application:** Global (dropdown menu)
- Created:** 2025-10-30 05:59:04
- Created by:** admin
- Merged to:** (empty field)

Buttons and Links:

- Update:** (button at the top right)
- Related Links:** Merge With Another Update Set, Scan Update Set
- Customer Updates:** Update Set Logs, Child Update Sets, Install History

Table:

Created	Type	View	Target name	Updated by	Remote update set	Action
---------	------	------	-------------	------------	-------------------	--------

This screenshot shows the 'Catalog Item - Laptop Request' form in ServiceNow. The form is divided into two main sections: a top section for metadata and a bottom section for details and description.

Top Section (Metadata):

- Name:** Laptop Request (highlighted with a green box)
- Application:** Global (dropdown menu)
- Catalogs:** Service Catalog (dropdown menu)
- Category:** Hardware (dropdown menu)
- State:** -- None -- (dropdown menu)
- Checked out:** -- None -- (dropdown menu)
- Owner:** System Administrator (dropdown menu)
- Active:** ☒ (checkbox)
- Fulfillment automation level:** Unspecified (dropdown menu)

Buttons:

- Copy, Try It, Update, Edit in Catalog Builder, Delete:** (buttons at the top right)

Bottom Section (Details):

- Item Details:** Process Engine, Picture, Pricing, Portal Settings (tabs)
- Short description:** Use this item to request a new laptop
- Description:** (rich text editor with a toolbar)

Catalog UI Policy - show accessories details

Catalog UI policies are similar to standard UI policies. Catalog UI policies dynamically change variables that are part of a catalog item or change how variable sets are handled. Policies can also be applied when the variables are present in a Requested Item or Catalog Task form. [More Info](#)

Applies to: Application:

* Catalog item:

* Short description:

Active: ☒

When to Apply ☒ **Script**

Catalog UI policy actions are applied only if all the following conditions are met:

1. The catalog UI policy is **Active**
2. The items in the **Conditions** field evaluate to true
3. The field specified in the catalog UI policy is present on the specified catalog item

Catalog Conditions:
